

1 Treasury Management Indicators

1.1 The Councils measure and manage their exposure to treasury management risks using the following indicators.

1.2 **Security:** The Councils have adopted a voluntary measure of exposure to credit risk by monitoring the value-weighted average credit score of their investment portfolios. This is calculated by applying a score to each investment (AAA=1, AA+=2, etc.) and taking the arithmetic average, weighted by the size of each investment. Unrated investments are assigned a score based on their perceived risk.

Portfolio Average Credit Score	30.09.20 Actual	2020/21 Target	Complied
Babergh	5.17	7.0	✓
Mid Suffolk	4.72	7.0	✓

1.3 **Liquidity:** The Councils have adopted a voluntary measure of exposure to liquidity risk by monitoring the amount they can borrow each period without giving prior notice.

Total sum borrowed in the past 3 months without prior notice	30.09.20 Actual	2020/21 Target	Complied
Babergh District Council	Nil	£5m	✓
Mid Suffolk District Council	Nil	£5m	✓

1.4 **Interest Rate Exposures:** This indicator is set to control the Councils' exposure to interest rate risk. The upper limits on the one-year revenue impact of a 1% rise or fall in interest was:

Babergh District Council	£0.074m	£0.490m	✓
Mid Suffolk District Council	£0.078m	£0.708m	✓

1.5 The impact of a change in interest rates is calculated on the assumption that maturing loans and investment will be replaced at current rates.

1.6 **Maturity Structure of Borrowing:** This indicator is set to control the Councils' exposure to refinancing risk. The upper and lower limits on the maturity structure of all borrowing are shown in the following table:
